### Notes

---

This week we are going to be looking at the number 10.

Monday - Please watch the numberblocks episode about number 10. <https://www.bbc.co.uk/iplayer/episode/b08phr1g/numberblocks-series-2-ten> Can you find 10 objects in your house? Maybe you could count out 10 spoons? Or 10 bricks?

Tuesday - Count how many fingers you have. Do you have ten of anything else? Create some numberblocks handprint pictures. You could use paint to print your fingers and toes, or you could draw around your hands and colour them like the numberblocks. Please look at the photo above as an example of this.

Wednesday - Can you do 10 claps? Can you do 10 jumps? Can you do 10 hops? Can you throw and catch a ball 10 times without dropping it?

Thursday - Write the numbers 7, 8, 9 and 10 on pieces of paper. Place them in the four corners of your room. Say one of the numbers. Children can then go and stand next to that number. You could also challenge your child by giving them simple calculations e.g.  $6 + 1$ . Can they go and stand next to the answer?

Friday - Watch the numberblocks episode about counting to 10. <https://www.bbc.co.uk/iplayer/episode/b0bmkh2z/numberblocks-series-3-numberblobs> Can you use objects in your house to represent the numbers 1-10 like the numberblocks do in the episode. You could write the numbers on pieces of paper and then put that many objects next to them e.g. 1 with 1 car, 2 with 2 dinosaurs. Maybe you could use bricks to build a numberline, starting with a tower of 1 block and finishing with a tower of 10 blocks.
